

# Green Earth Missiles instructions

## step 1

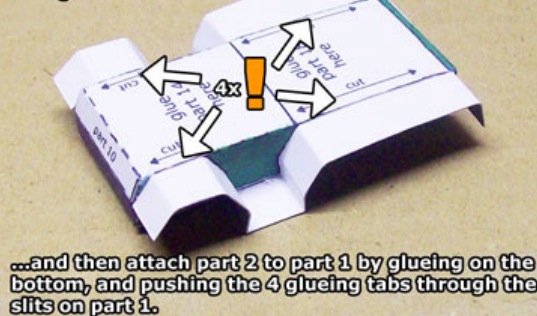

## step 2

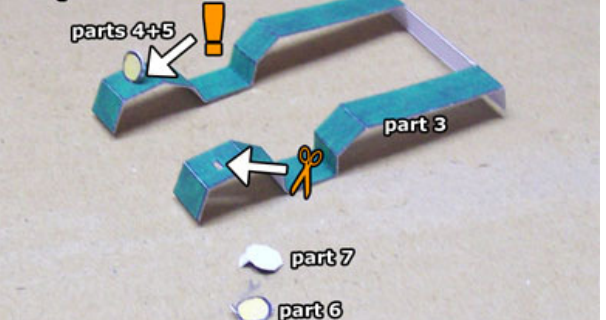

Cut out the four slits on part 1 and then assemble it as shown here. Then pre-shape part 2 with the coloured side down (DON'T score or fold the 4 larger glueing tabs...

## step 3

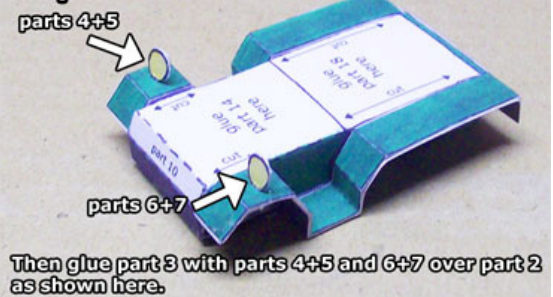

## step 4

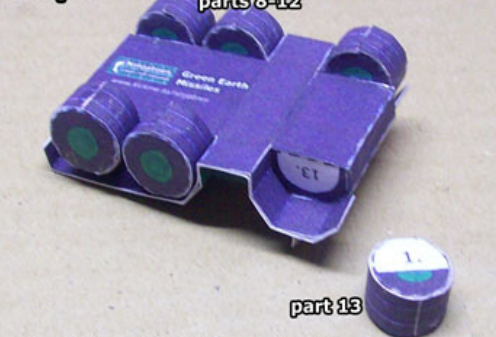

Pre-shape part 3 and cut out the 2 small slits on part 3. Glue parts 4 and 5 and parts 6 and 7 back-to-back, and then glue them through the two small slits.

## step 5

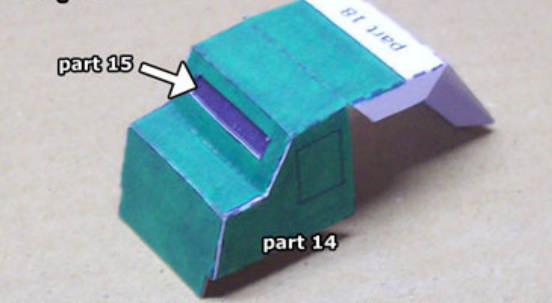

### step 6

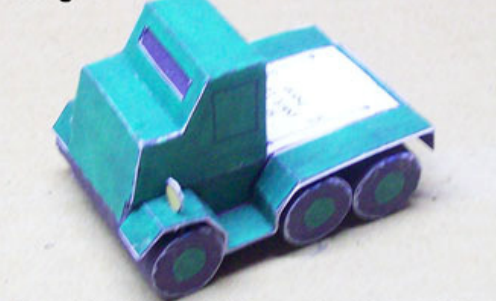

Assemble parts 8-12, and glue them underneath the chassis as shown here.

### step 7

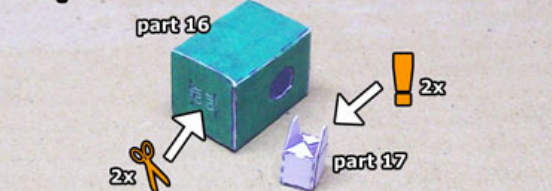

Cut out part 14, but before assembling it completely, glue part 15 underneath the hole at the front.

### step 8

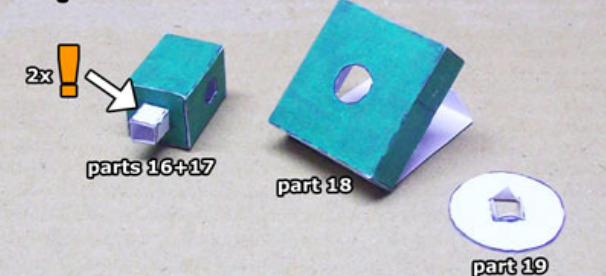

Close the back and bottom of part 14, and then glue it to on top of the chassis as shown here.

### step 9

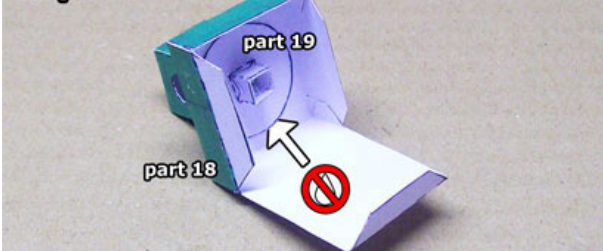

Cut out the 2 holes and 2 small slits on part 16 before assembling it, and then glue together part 17 (DON'T score or fold the two larger glueing tabs!)

### step 10

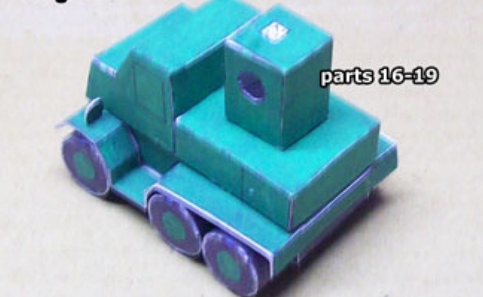

Glue part 17 to the bottom of part 16 by pushing the two glueing tabs through the slits. Then cut out parts 18 and 19, but DON'T completely close part 18 yet!

### step 11

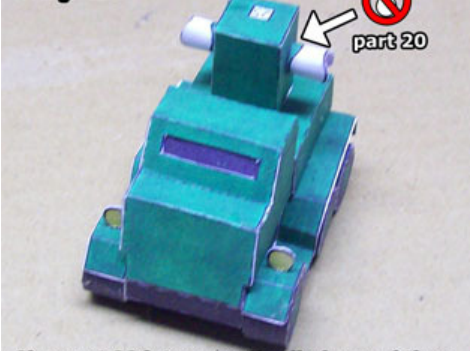

Push part 17 through the hole on part 18 (DON'T use any glue for this!) and then glue part 19 over the axle as shown here (DON'T glue part 19 to the inside of part 18, though!)

### step 12

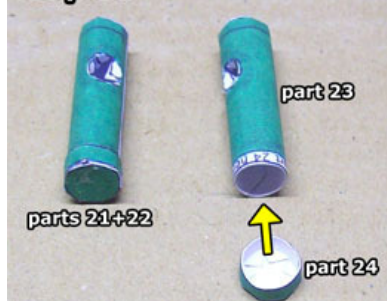

Close the bottom of part 18, and then glue the completely assembly on top of the chassis.

### step 13

Glue part 20 into a small cylinder, and then push it through the holes on the sides of part 16 (DON'T use any glue for this!)

### step 14

Assemble and glue together parts 21 and 22 and parts 23 and 24...

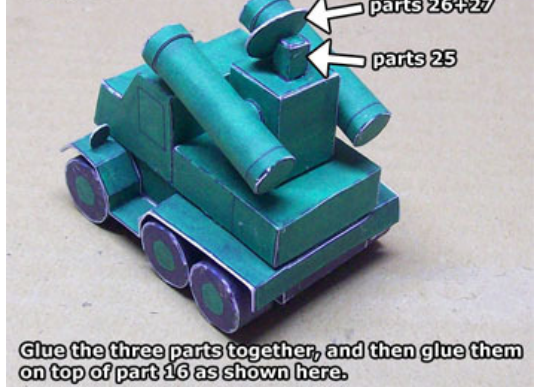

### step 15

### step 16

### step 17

### step 18
